Experience

2022-Present

Avonic B.V. | Delfgauw

Team Lead Software Development

In addition to the tasks of a Software Developer, I have also had responsibilities that belong to a leadership position in a software team:

- Overall responsibility for all technical decisions regarding software design and operational processes within the team such as planning sprints and defining tasks.
- Translating management requirements to the team and ensuring sprint processes run smoothly.
- Managing, coaching, and motivating the team and conducting performance reviews with employees.
- Maintaining contact with external collaboration partners.
- Jointly responsible for budget management of the software development team.

Milestones:

- Set up a complete software team. Starting with 2 developers and growing it to a team of 6 developers.
- Designing and building a working CI/CD pipeline to speed up development.
- Planning, building, and publishing a new product within a month.

2021 - 2022

Avonic B.V. | Delfgauw

Software Developer

Helped with building a software product using the following techniques:

- Python
- Computer Vision
- Neural Networks
- Docker
- Gstreamer
- Yocto Linux
- React/Javascript

2020 - 2021

ML6 | Amsterdam

Thesis Internship

- Experience with Reinforcement Learning, Google Cloud and Unreal Engine
- Research in the field of Artificial Intelligence
